Following the editor's comments, edition changes have been made in our manuscript.

1. We changed the manuscript title to one including clearly the study design
2. We reformatted smaller tables onto a portrait format and placed them at the end of the manuscript
3. We submitted the largest tables as additional tables
4. All references have been aligned

We sincerely thank the editor and the reviewers and editorial assistant for the helpful comments and suggestions that contributed to the improvement of the manuscript.

Sincerely yours,

Ferran Ballester on behalf of the authors
