

## **Author's response to reviews**

**Title:** Serum PCB levels and congener profiles among US construction workers

### **Authors:**

Robert F Herrick ([herrick@hohp.harvard.edu](mailto:herrick@hohp.harvard.edu))

John D Meeker ([meekerj@umich.edu](mailto:meekerj@umich.edu))

Russ Hauser ([hauser@hohp.harvard.edu](mailto:hauser@hohp.harvard.edu))

Larisa Altshul ([laltshul@hsph.harvard.edu](mailto:laltshul@hsph.harvard.edu))

George A Weymouth ([weycor@msn.com](mailto:weycor@msn.com))

**Version:** 4 **Date:** 9 August 2007

### **Author's response to reviews:**

The final revisions requested by Dr. Ozonoff (All pages should be numbered.

In references, ensure journal format style is followed (remove periods after journal title, list all pages, volume should be in bold, remove periods in journal abbreviations, remove extra spacing, etc.). In table 2, all rows and columns should be visibly distinct (display borders of each cell).

Include figure legends (max 300 words) in the MS.

Minimize white space in figures as much as possible.)

have been made in the manuscript.
