**Version:** 3 **Date:** 23 June 2008

### **Author's response to reviews:**

Drs. Philippe Grandjean and David Ozonoff,

RE: MS: 6489178671766549

Thank you for accepting our manuscript for publication. I have made the editorial assistant's suggested revisions including the following:

In the title, use lower case after the colon (...variability: a panel study...).

Indicate full institutional addresses for all authors, include country in details.

In References, do not list issue number.

Check format in reference 11. In reference 12, remove colon after 'In'.

In tables, ensure cell lines display as black lines.

In addition, I request a slight modification, changing "night" to "nocturnal":

"PM2.5 metal exposures and nocturnal heart rate variability: a panel study of boilermaker construction workers"

Please let me know of any additional edits that are required prior to publication.

Best,

Jennifer Cavallari, ScD, CIH

Harvard School of Public Health
