Title: Assessing Poisoning Risks Related to Storage of Household Hazardous Materials: Using a Focus Group to Improve a Survey Questionnaire

Authors:

Martin M Kaufman (martyk@umflint.edu)

Susan Smolinske (ssmolins@dmc.org)

David Keswick (dkeswick@umflint.edu)

Version: 4 **Date:** 4 August 2005

Author's response to reviews:

The two minor text revisions suggested by the reviewers have been implemented. We have also addressed every format issue suggested: included full street addresses; removed unnecessary capitalization from the title; used proper reference format within the text; double-spaced the paper; checked for hard returns; included a list of abbreviations; and formatted the references and table per journal guidelines).

We thank the reviewers again for their insightful comments.
