

Reviewer's report

Title: Land Use Regression Modeling of Intra-Urban Residential Variability in Multiple Traffic-Related Air Pollutants

Version: 2 Date: 31 March 2008

Reviewer: Jeff Brook

Reviewer's report:

The authors have sufficiently addressed all of my earlier comments.

The revised paper is now clearer, more balanced and provides a good discussion of limitations and current and future challenges.

This work represents a very good addition to literature on the subject of exposure estimation to traffic and related pollutants for urban dwellers/cohorts.

Level of interest: An article of importance in its field

Quality of written English: Acceptable

Statistical review: No, the manuscript does not need to be seen by a statistician.

Declaration of competing interests:

I have no conflicts.
