The Environmental Health Editorial Team

Dear Sir

We are returning herewith the manuscript entitled " Effect of dioxins on regulation of tyrosine hydroxylase gene expression by aryl hydrocarbon receptor: a neurotoxicology study" (MS: 5104883242583392).

Here are revisions for your comments:

>1. In the abstract, you explain terms like AhR, TH and XRE though AHRE-III is not. >Please insert a brief explanation like the others noted.

We added an explanation "aryl hydrocarbon receptor responsive element III (AHRE-III)" in the abstract section.

> 2. On page 19, the first paragraph is indented, though all others in the paper are not. >Please bring the first sentence back to the left margin.

We brought the first sentence back to the left margin on page 19.

>3. Tables as additional files: If you want the tables to be visible within the final published >manuscript please include them in the manuscript in a tables section following the >references, and not attached as additional files.

We laid out the Table 1 in the manuscript according to the instructions.

We believe that the revised manuscript is now acceptable for the review processes.

We would be appreciated if you would consider its publication in Environmental Health: A Global Access Science Source.

Thank you very much for your consideration.

Sincerely yours,

Mitsuko Ishihara-Sugano
